FIRST JUNK CATALOGUS SUPPLEMENT APPEARS

The first of the Coleopterorum Catalogus Supplementa (Pars 1: Rhysodidae) was received in late August. This series is under the editorship of W. D. Hincks (vide: Col. Bull., vol. 3, pp. 30-32) and is printed by Uitgeverij Dr. W. Junk in the same format as the Junk Schenkling original catalog. This first part is a complete catalog of this family, but the larger parts will simply be supplements designed to bring the original catalogs up to date.

It is also to be noted that the entire set of 31 volumes, 1910-1940, is still available at 1200 Dutch Guilders (circa \$400.00), except that five of the parts, destroyed during the war, are not available. These parts are being reprinted, and apparently orders are being accepted for them.

R. H. ARNETT, JR.

CURRENT LITERATURE

Compiled by ROSS H. ARNETT, JR.

This section is designed to contain all papers on the Coleoptera of North and South America which are not in the Leng (1920) catalogue or the supplements, or papers containing new species and records not included in Blackwelder's Neotropical checklist and which have not been previously listed in *The Coleopterists' Bulletin*.

Additions to the list of publications available:

Biblic. Agric.—Bibliography of Agriculture
 Indian Journ. Ent.—The Indian Journal of Entomology
 Bol. Ent. Venezolana—Boletín de Entomología Venezolana
 Arqu. Mus. Paranaense—Arquivos do Museu Paranaense
